

Execution Quality

Internaxx Bank S.A route all client orders via a single international counterparty, Interactive Investor Services Limited (IISL). IISL monitor and record their quality of execution using an independent third party provider. Any trades executed outside the benchmarked price are reviewed and challenged. Additionally IISL have invested in a best execution monitoring solution to review trades as they are executed. This, in conjunction with controls on agreed tolerances on acceptable price ranges, allows us to deliver best execution for customers.

For further detail of our order execution arrangements please read our **Best Execution Policy**.

We have provided below information regarding IISL's top five execution venues in terms of trading volumes, and the top five investment firms where they have placed customer orders for execution (typically international orders) between 1st January to 31st December 2017.
